

Code to Integrate:
<https://github.com/OlehTspotan/University-Schedule>

System To Integrate: By user OlehTspotan, this git user has created a code that has a similar concept to what we are planning, they have an admin dashboard, a way to create and view schedules within the system and an authorization system

Requirement Modifications: The system found has a majority of what would be needed for our own sysyem, Modifications might include making sure the instructor and student are able to function within the system with no issues, along with formatting the system to our desired look.

System Design: we are modifying, the admin privliges, student privliges, instructor privliges, the Add/drop system, and how the sceduleing works.
